Science to Data Science

[www.s2ds.org](http://www.s2ds.org)

## Become a Data Scientist

Data Science is a fast-growing field which touches on almost every industry, from media to commerce to tech, and as a result there are a variety of roles available. The technical nature of the job, and the shortage of quality candidates, means that Data Science is a lucrative career. For those who are considering leaving academia, but who want to continue working in a research capacity, Data Science offers an opportunity to utilise their expertise and knowledge, solving interesting problems with real-world applications.

At Pivigo, we aim to facilitate and support PhD's and MSc's transition from academia to industry. Run by Pivigo, The Data Science Hub, the S2DS programme provides participants with experience solving real-life big data problems, providing them with the commercial skills needed in business.

Across both programmes there are three important elements; theoretical learning, practical learning and professional development.

### Benefits and Features

- ★ **Largest Data Science boot camp in Europe**
- ★ **Five-week programme, at our London campus or online via our Virtual campus**
- ★ **Take on a real-world Data Science problem, developed with one of our partner companies**
- ★ **Work with large multinationals, charities, SME's, and exciting start-ups**
- ★ **Gain practical experience with Data Science technologies and technical skills in a commercial environment**
- ★ **Join a network of over 300 S2DS fellows and Data Scientists**
- ★ **Work with brands such as Barclays, Google Cloud, Royal Mail, KPMG and many more**

At Pivigo we want to support a large and thriving Data Science community through our Ambassador Programme. As a Pivigo Ambassador at your university you will be a part of one of the most exciting Data Science communities in Europe. We will support you to:

#### ADVOCATE

Promote Data Science on your campus

#### EVENTS

Host hackathons, meetups and talks

#### SHARE CONTENT

Spread the word on the latest developments in Data Science

#### NETWORK

Build networks and contacts with Data Science enthusiasts on campus

**300  
FELLOWS**

**50  
NATIONALITIES**

**20 DIFFERENT  
DISCIPLINARY  
BACKGROUNDS**

**35%  
PARTICIPATION  
WOMEN**

The S2DS network is large and diverse, bringing the best and the brightest talent together across the world to solve data problems and have fun.
